

## **Year 4 Homework support/examples video links for the whole half term.**

If you are stuck on the method of a problem please look at these videos to see an example of a similar type of question. These are NOT the answers for this week's homework and are only to support you with the methods and give you an example for each question. If you are stuck on a question on page 2, you only need to watch the page 2 video etc.
